Student ID / GH Code: GH-1059387

PERSONAL PROFILE

Highly motivated and tech-driven Computer Science undergraduate with a strong foundation in software logic, modern web structures, and structured document design. Recognized for being an analytical thinker and an adaptable, fast learner who excels at parsing complex code syntax, debugging environments, and rapidly adopting new language systems to resolve technical problems.

EDUCATION

Gisma University of Applied Sciences

Berlin, Germany

BSc in Computer Science

June 2026)

- Core Laboratory Modules: B201 Computer Science Lab.
- Practiced elementary data handling, text manipulation, and calculation logic.
- Studied document production systems and code layout control.

Secondary School Education

Completed

- Acquired foundational programming principles, HTML markup structures, and Python programming workflows.
- Collaborated in a peer group to design, build, and present a basic interactive game utilizing Python programming syntax for the final graduation project.

TECHNICAL SKILLS

<i>Languages</i>	Python, HTML5, CSS3 markup systems.
<i>Applications</i>	Git terminal command lines, GitHub online hosting setups.
<i>Environments</i>	Jupyter Notebook documents, IDLE script execution paths.
<i>Typesetting</i>	LaTeX styling, Overleaf layout compilation environments.

LANGUAGES

Urdu • Hindi • English • Arabic • German

ACADEMIC PROJECTS

Computer Science Lab Personal Portfolio Webpage

- Constructed and maintained an organized remote file repository structure.
- Programmed a foundational grade-calculating logic script named `grades.py`.
- Published and deployed an automated, live index page using GitHub Pages.
